

## SEMESTER S4

### SOFT COMPUTING

(Common to CS/CD/CM/CR/CA/AD/AI/AM/CB/CN/CI)

|                                           |                 |                    |                |
|-------------------------------------------|-----------------|--------------------|----------------|
| <b>Course Code</b>                        | <b>PECST417</b> | <b>CIE Marks</b>   | 40             |
| <b>Teaching Hours/Week<br/>(L:T:P: R)</b> | 3:0:0:0         | <b>ESE Marks</b>   | 60             |
| <b>Credits</b>                            | 3               | <b>Exam Hours</b>  | 2 Hrs. 30 Min. |
| <b>Prerequisites (if any)</b>             | None            | <b>Course Type</b> | Theory         |

#### Course Objectives:

1. To give exposure on soft computing, various types of soft computing techniques, and applications of soft computing
2. To impart solid foundations on Neural Networks, its architecture, functions and various algorithms involved, Fuzzy Logic, various fuzzy systems and their functions, and Genetic algorithms, its applications and advances.

### SYLLABUS

| <b>Module No.</b> | <b>Syllabus Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                 | <b>Contact Hours</b> |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>1</b>          | Introduction to Soft Computing. Difference between Hard Computing & Soft Computing. Applications of Soft Computing. Artificial Neurons Vs Biological Neurons. Basic models of artificial neural networks – Connections, Learning, Activation Functions. McCulloch and Pitts Neuron. Hebb network, Perceptron Networks– Learning rule, Training and testing algorithm. Adaptive Linear Neuron– Architecture, Training and testing algorithm. | <b>10</b>            |
| <b>2</b>          | Fuzzy logic, Fuzzy sets – Properties, Fuzzy membership functions, Features of Fuzzy membership functions. operations on fuzzy set. Linguistic variables, Linguistic hedges Fuzzy Relations, Fuzzy If-Then Rules, Fuzzification, Defuzzification– Lambda cuts, Defuzzification methods. Fuzzy Inference mechanism - Mamdani and Sugeno types.                                                                                                | <b>9</b>             |
| <b>3</b>          | Evolutionary Computing, Terminologies of Evolutionary Computing, Concepts of genetic algorithm. Operators in genetic algorithm - coding,                                                                                                                                                                                                                                                                                                    | <b>8</b>             |

|          |                                                                                                                                                                                                                                                                    |          |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
|          | selection, cross over, mutation. Stopping condition for genetic algorithm.                                                                                                                                                                                         |          |
| <b>4</b> | Multi-objective optimization problem. Principles of Multi- objective optimization, Dominance and pareto-optimality. Optimality conditions. Collective Systems, Biological Self-Organization, Particle Swarm Optimization, Ant Colony Optimization, Swarm Robotics. | <b>9</b> |

### Course Assessment Method

(CIE: 40 marks, ESE: 60 marks)

#### Continuous Internal Evaluation Marks (CIE):

| Attendance | Assignment/<br>Microproject | Internal<br>Examination-1<br>(Written) | Internal<br>Examination- 2<br>(Written) | Total     |
|------------|-----------------------------|----------------------------------------|-----------------------------------------|-----------|
| <b>5</b>   | <b>15</b>                   | <b>10</b>                              | <b>10</b>                               | <b>40</b> |

#### End Semester Examination Marks (ESE)

*In Part A, all questions need to be answered and in Part B, each student can choose any one full question out of two questions*

| Part A                                                                                                                                                             | Part B                                                                                                                                                                                                                                                                          | Total     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <ul style="list-style-type: none"> <li>2 Questions from each module.</li> <li>Total of 8 Questions, each carrying 3 marks</li> </ul> <p><b>(8x3 =24 marks)</b></p> | <ul style="list-style-type: none"> <li>Each question carries 9 marks.</li> <li>Two questions will be given from each module, out of which 1 question should be answered.</li> <li>Each question can have a maximum of 3 subdivisions.</li> </ul> <p><b>(4x9 = 36 marks)</b></p> | <b>60</b> |

## Course Outcomes (COs)

At the end of the course students should be able to:

| Course Outcome |                                                                                                                 | Bloom's Knowledge Level (KL) |
|----------------|-----------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>CO1</b>     | Describe the techniques used in soft computing and outline the fundamental models of artificial neural networks | <b>K2</b>                    |
| <b>CO2</b>     | Solve practical problems using neural networks                                                                  | <b>K3</b>                    |
| <b>CO3</b>     | Illustrate the operations, model, and applications of fuzzy logic.                                              | <b>K3</b>                    |
| <b>CO4</b>     | Illustrate the concepts of evolutionary algorithms such as Genetic Algorithm                                    | <b>K3</b>                    |
| <b>CO5</b>     | Describe the concepts of multi-objective optimization models and collective systems.                            | <b>K2</b>                    |

Note: K1- Remember, K2- Understand, K3- Apply, K4- Analyse, K5- Evaluate, K6- Create

### *CO-PO Mapping Table (Mapping of Course Outcomes to Program Outcomes)*

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|
| <b>CO1</b> | 3   | 3   | 3   |     |     |     |     |     |     |      |      | 3    |
| <b>CO2</b> | 3   | 3   | 2   | 2   |     |     |     |     |     |      |      | 3    |
| <b>CO3</b> | 3   | 3   | 3   | 2   |     |     |     |     |     |      |      | 3    |
| <b>CO4</b> | 3   | 3   | 2   | 2   |     |     |     |     |     |      |      | 3    |
| <b>CO5</b> | 3   | 3   | 3   |     |     |     |     |     |     |      |      | 3    |

Note: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), -: No Correlation

| Text Books |                                                                                                   |                            |                         |                  |
|------------|---------------------------------------------------------------------------------------------------|----------------------------|-------------------------|------------------|
| Sl. No     | Title of the Book                                                                                 | Name of the Author/s       | Name of the Publisher   | Edition and Year |
| <b>1</b>   | Principles of Soft Computing                                                                      | S.N.Sivanandam, S.N. Deepa | John Wiley & Sons.      | 3/e, 2018        |
| <b>2</b>   | Multi-objective Optimization using Evolutionary Algorithms                                        | Kalyanmoy Deb,             | John Wiley & Sons       | 1/e, 2009        |
| <b>3</b>   | Computational intelligence: synergies of fuzzy logic, neural networks and evolutionary computing. | Siddique N, Adeli H.       | John Wiley & Sons       | 1/e, 2013        |
| <b>4</b>   | Bio-inspired artificial intelligence: theories, methods, and technologies.                        | Floreano D, Mattiussi C.   | MIT press; 2008 Aug 22. | 1/e, 2023        |

| Reference Books |                                                                              |                                          |                        |                  |
|-----------------|------------------------------------------------------------------------------|------------------------------------------|------------------------|------------------|
